

BIG IDEAS

LONDON 2023

Thursday, March 9

9:30 AM - 12:30 PM (GMT)

WHAT IS THE BIG IDEAS SUMMIT?

Every day we feel the pressure inflicted on Procurement teams.

If it's not inflation, it's a geopolitical supply chain throttle; if you aren't juggling more contractors than ever, you're under pressure to manage risk while closing deals with higher stakes... Often with less support.

Fortunately, the Big Ideas Summit – the influential global event for procurement and supply chain professionals – is back for another exciting year.

The Big Ideas Summit is the most innovative leadership event for our profession. Join us as we come together to share the must-have ideas, plans, experiences, and innovations that we have developed to meet the challenges of yesterday, today, and tomorrow.

Open your mind and dream big as you join your peers from around Europe, and the world; hear the latest insights from global thought leaders; and harness the latest big ideas and practical solutions, including :

- Containing the swell of inflation
- Fortifying your defenses against geopolitical risk
- Sharpening your negotiation skills for resilience
- Leading a diverse and transient workforce
- Fostering a strong culture of diversity and inclusion
- Forging sustainable plans and strategies.

Think big and drive real change. **Register today.**

WHO WILL ATTEND?

- CPOs
- Heads of Procurement
- Senior procurement and supply chain professionals
- Future procurement leaders

WHY THE BIG IDEAS SUMMIT

This unique event features internationally-renowned speakers and world-class thought leaders taking part in spirited think tank-style debates, while hundreds across the world participate online.

For those not joining in person, you can take part online via the Procurious platform. Follow the day's action, submit questions to the speakers and CPOs, live-stream presentations and watch exclusive interviews with the speakers.

The Big Ideas Summits spark dynamic discussions among the profession's leading voices, while you crowdsource ideas for the future of procurement and supply chain.

It's never too late to take control of your career - and the world!
